

## Proud to Present PF Jones Vehicle Specific Towing Electrics

PF Jones has been a strong brand in the supply of towbars and electrics for 60 years; PF Jones towbars, an individual own brand of towbars to compete in the market as a budget option has been successful in both trade and consumer markets. There has been a shortage of supply from manufacturers in recent years on both towbars and electrics, with this in mind PF Jones has opted to have their own brand of towbar electrics manufactured by specialists ConWys in Switzerland.

PF Jones electrics kits are manufactured in Switzerland but stocked in high levels at all 4 of PF Jones' UK branches & warehouses to ensure a streamlined supply. Each kit ordered on our website or through general customer services will be full function and available to fit all cars and vans where technology will allow; for traders kits will be available to purchase without extensions.

Kits are available to order over the phone now and will be available via the website and product catalogue in due course.
